

FOR IMMEDIATE RELEASE

OOO Announces model e2 with Built-In HSDPA Mobile Broadband Capability Award-winning ultra mobile PC now available with open-SIM 3G data access`

Monday, December 10, 2007– OOO, Inc., creator of the world's smallest fully-functional Windows Vista® PC, today announced availability of the new model e2 with embedded HSDPA mobile broadband capability, providing customers in Europe and Asia with widely-available high-speed Internet connectivity. The OOO model e2 with embedded HSDPA is designed specifically to meet international demand for anytime/anywhere computing with access to the Internet and networked PC applications in a pocketable and ergonomic form factor.

"Savvy individuals and enterprise users around the world are demanding access to all their information and applications wherever they go," said Dennis Moore, CEO, OOO. "We are seeing rapid growth in Europe and Asia, and the release of the model e2 with built-in HSDPA positions OOO in these markets as the leader in next-generation mobile computing."

The model e2 with embedded mobile broadband supports data access through UMTS/HSDPA at 2100MHz, and is downward compatible with GPRS/EDGE networks at 900MHz and 1800MHz. Download speeds of up to 3.6 Mbps are supported. The product is available SIM-free and network unlocked, allowing customer's maximum flexibility in selecting their preferred wireless operator and data plan. Users of the model e2 have their choice of connectivity options, including tri-band wide-area wireless, WiFi 802.11a/b/g and Bluetooth 2.0.

OOO pioneered the ultra mobile PC category, and earlier this year released the first UMPC with embedded 3G mobile broadband capability for the United States, based on CDMA EV-DO technology. With today's announcement, the integration of 3G UMTS/HSDPA technologies further establishes OOO's commitment to leadership in this growing category and to providing mobility solutions for European and Asian markets.

"The recently launched model e2 has already been a hot seller for us. I use one myself and it has revolutionized the way I work," said Hugo Ortega, Principal of UMPC Distributor Tegatech Australia. "With the addition of HSDPA, we are expecting even stronger demand. The OOO model e2 with HSDPA is the ultimate mobile productivity device, and a great holiday gift"

About Tegatech Australia

Tegatech Australia is the only Tablet PC specific Distributor in the Australia/NZ marketplace. By focusing so heavily on the Tablet PC form factor Tegatech has enhanced the Reseller experience via a commitment to training and support. Close ties to Microsoft creates a synergy that allows resellers to grow and enhance their presence in the Tablet space.

Established in 2003 Tegatech is now seen as a market leader in the Tablet PC arena. By targeting resellers-only Tegatech has grown from strength-to-strength. Via strategic reseller partnerships that focus on vertical markets, and the corporate sectors, Tegatech is creating a groundswell of interest. Current UMPC successes include the Newslimited, Audi Australia and much more.
