

Introducing the newest members of our ultra-mobile family.

TabletKiosk **eo-i7210** UMPC
powered by the Intel® Pentium® M ULV processor

Featuring a 1.3 Mega pixel CMOS camera with video capture capabilities and two built-in microphones for video conferencing on the go!

TabletKiosk **eo-i72DC**
included Docking Cradle

Say hello to the i7200 Series

Part of Microsoft's Ultra-Mobile PC initiative, **eo** features a compact, lightweight design that packs all the power and compatibility of the full version of Microsoft® Windows® XP Professional.

Designed for ultra-portability and convenience, the **eo-i7210** and **i7209** feature wireless connectivity, an LCD touch-screen, handwriting recognition, a 1.3 Mpixel camera with video capture capability and a built-in 4-in-1 media card reader—all powered by an Intel® Mobile ULV processor.

TabletKiosk **eo-i7209** UMPC
powered by the Intel® Celeron® M ULV processor

Utilizing the **eo-i7200** Series UMPCs, mobile business professionals can accomplish everyday tasks with unparalleled efficiency—
Like taking handwritten notes, planning meetings, reading e-mail, conducting a video conference with co-workers, and even taking and sharing photos and videos.

eo-i7200 Series UMPCs are the powerful, mobile computing solution that enables you to connect, communicate and accomplish any task anywhere, so you can stay informed and in control.
