

Tony "The WordPress Guy" Cosentino spends his days building websites - yet he's not chained to his desk, thanks to Tegatech's **TEGA v1** Tablet.

In search of a mobile work companion, Cosentino saw the appeal of tablet computing but wasn't prepared to make sacrifices in terms of features and functionality. A self-confessed Mac fanboy, Cosentino was naturally interested in Apple's iPad but was won over by the power and flexibility of Tegatech's Windows 7-powered **TEGA v1** Tablet.

"I was drawn to Tegatech's TEGA v1 because I liked the iPad but I couldn't get by with the stripped-down operating system," Cosentino says.

"Meanwhile the TEGA v1 - a Windows 7 touchscreen tablet - offers me the portability and convenience of the iPad but with the bonus of a full-blown operating system. Whether I'm sitting in a cafe or riding on the bus, the TEGA v1 lets me do everything I need to do - so I've got the advantages of a tablet without having to forgo using a real computer."

The TEGA v1 tablet sports a large 10.2-inch TFT LCD touchscreen, with a built-in HSDPA modem designed to stay online while you're out and about. It's only 25mm thick and weighs in at a mere 1kg, making it easy to slip the TEGA v1 in your bag when walking out the door.

"The device just had so much going for it - with the ports, screen resolution and portability it really is everything the iPad isn't. It features a virtual onscreen keyboard, but one thing I love about the TEGA v1 is the option to use the stylus to write directly on the screen. It picked up my handwriting very accurately and in no time I was happily writing away," Cosentino says.

"These days I use the TEGA Tablet to update my own WordPress websites and my clients' WordPress websites, plus I can easily write posts and run my business while out and about."

"Another thing that's really impressed me about the TEGA v1 is not just the device but the level of service offered by the team at Tegatech. When you're

Case Study: The WordPress Guy – Tony Cosentino

embracing new technologies such as tablets, you are reliant on good support to help you get the most out of your investment. I've found Tegatech's support outstanding - they understand the tablet space and never shy away from any support questions. I know I'm in good hands with Tegatech.
